Chloe Lu

Gothenburg / Stockholm, Sweden · 076 297 9518 · chloeluxyu@gmail.com · chloeluxyu.github.io · linkedin.com/in/chloe-l-699b5a232

MSc student in Interaction Design and Technologies at Chalmers, with a BSc in Computer and Systems Sciences. I run user research and turn it into clear design decisions, working prototypes and findings that stakeholders can act on. Seeking a master's thesis project and roles from 2027 in UX research and design, product, or technology consulting. Fluent in Swedish, English and Mandarin.

EDUCATION

MSc, Interaction Design and Technologies, Chalmers University of Technology — Aug 2025 – present

BSc, Computer and Systems Sciences, Stockholm University — Aug 2021 – Jun 2024

Bachelor's thesis (co-authored with Lova Avolten): how designers with different technical experience use a Figma-to-Android Studio plugin to bridge design and code.

Project Management Certificate, Google / Coursera — Jul – Sep 2024

PROFESSIONAL EXPERIENCE

Project Moderator (Client: Apple), Dataforce, Stockholm — Mar – Jun 2025 & Jun – Aug 2026

- Facilitated and moderated 100+ on-site user testing and AI training data collection sessions for Apple across two engagements, running participant briefings, guiding structured research protocols, and capturing behavioural observations live.
- Documented findings, tracked open items, and translated on-site observations into clear, structured notes and datasets for engineering and research stakeholders.
- Executed Python scripts to automate file handling, validate data quality, and manage structured uploads to internal systems, ensuring consistent, scalable data pipelines across sessions and sites.
- Authored and rolled out SOPs that clarified handoffs across teams and enabled consistent execution as sessions scaled across cohorts and a second engagement.

Research Consultant, Opticom International Research, Stockholm — Nov 2024 – Jan 2026

- Conducted qualitative and quantitative user research with international stakeholders across multiple markets, benchmarking regional patterns and emerging trends to extract transferable insights that informed strategic decisions.
- Synthesized complex, multi-market datasets into structured comparative analyses, dashboards, and reports, translating findings into actionable recommendations for cross-functional product stakeholders.

Program Coordinator, Absolute Internship, Stockholm & Barcelona — Jun – Aug 2025

- Managed end-to-end program operations for an international student program in Sweden, owning multi-party scheduling, partner matching, and weekly programming.
- Acted as central point of contact between students, host companies, internal teams, and external partners, aligning stakeholders and following up to keep deliverables on track.
- Maintained shared trackers, status updates, and structured documentation across the program, improving coordination and helping the team catch issues before they affected delivery.
- Facilitated weekly check-ins and networking sessions, identifying recurring issues and proposing simplifications that were adopted by the team.

UX/UI Intern, Buddycompany, Stockholm Jan – Jun 2024

- Coordinated research, usability testing, and A/B test execution across web and mobile products, working with developers, marketing, and analytics.
- Worked in weekly sprint and stand-up cadences with developers and the marketing team, surfacing dependencies and risks early to keep delivery on schedule.
- Designed and iterated responsive interfaces and end-to-end user flows for both the web and mobile applications, taking work from wireframe through interactive prototype to engineering handoff.
- Combined CRM and Google Analytics data to prioritise redesigns, raising task completion by 20% and engagement by 30%.

SELECTED PROJECTS

Recycle Ready, recycling app for young city residents 2022 · 2026

Group project 2022, individual redesign 2026

- Ran contextual observation and interviews to understand how young residents sort waste and what keeps them motivated.
- Designed the scan and search flow in the original group prototype.
- Facilitated and moderated co-design workshops with 3 end users, then redesigned the whole app on my own from their input.
- Tested the redesign with the same users and documented the outcome of each phase: research, ideation, design and testing.

Frame Yourself in Time, generative-AI installation for Vasakronan 2026

Interaction design project, Chalmers

- Co-designed an AI installation concept with Vasakronan for a busy elevator waiting area, and designed the user flow and the project website.
- Built the AI scene and background generation (ComfyUI, Three.js) for a real-time projection experience that needs no technical background.
- Moderated the user testing, and designed, ran and analysed the survey: 33 responses, UEQ-S 2.03, top 10% of the benchmark.
- Used the pilot findings (engaging but slow to generate) to define two concrete redesign paths for the next iteration.

Data Driven Product Realization with Good Solutions AB, Chalmers 2026

Team of five, industry partner in Gothenburg

- Contributed to a proof-of-concept pipeline that ingests shop floor production data, computes OEE and loss analysis, and uses a large language model to translate technical output for non-specialists.
- Led the data analysis and translated stakeholder needs into requirements for an interactive Python dashboard to filter, validate and explore OEE, downtime and scrap trends.
- Turned raw data into a full report in minutes instead of hours or days, and evaluated the system's limits, contextual reasoning, data privacy and hallucination risk.

SKILLS

Research & analysis: contextual observation, interviews, surveys, usability testing, UEQ-S, co-design workshops, synthesis, Google Analytics, dashboards

Design & tools: Figma, prototyping, Webflow, WordPress, SurveyGenerator, Jira, Microsoft Office, Python, HTML, CSS, JavaScript

Project & coordination: agile teamwork, workshop facilitation, stakeholder communication

Languages: Swedish (fluent), English (fluent), Mandarin (native)
